

ASTUS 2012 SOFTWARE

A Solution That Caters to Your Specific Needs

Our Astus applications give you access to a wealth of data about your fleet, regardless of where you are. They follow you everywhere and simplify all tasks related to fleet management. For example, they allow you to:

- View your vehicles in real-time on a map
- Generate personalized reports
- Communicate with your drivers
- Plan vehicle maintenance

You will certainly find in Astus software the right tool, be it one or all of our applications! As an customer of Astus, we give you free access to all our software, so you can choose the one that fits your needs best.

Features

A result of years of development and technological progress, our Astus software is a powerful management tool, with several options tailored to different customer needs:

REAL TIME

- Information transmitted and displayed in real time: location, area, speed, driver identification, detection and localization of accessories activation, etc.
- Communication with drivers, task dispatching (with Garmin option)
- Emails and alerts for predefined conditions
- Availability of vehicles, with customizable status

REPORTS

- 50+ predefined reports with the ability to create and save custom reports
- Exporting of reports in CSV (for Microsoft Excel) and PDF (for Adobe Acrobat)
- Comparison of several reports spread across multiple displays

MAINTENANCE

- List of vehicles whose maintenance is due
- Listing of fuel bills and other expenses
- Maintenance cost per year

MANAGEMENT

- Organization of the fleet (vehicle groups, territories, etc.)
- User and user-right management
- Programming of custom actions

AVAILABLE SOFTWARE

Astus 2012

PC with Windows XP/Vista/7/8

With our most powerful management tool, Astus 2012, fleet managers can organize and schedule the most complex tasks, such as setting up alerts and notifications, managing users and employees, planning maintenances, programming automatic actions, etc. The software is installed as a "thin client", giving it greater security and easy installation and updates.

AstusCOM

Tablets: iPad, Android, Windows 8, BlackBerry
PC/Mac: Google Chrome, Firefox, IE 8-9-10

Born out of a close collaboration between our team of developers and our design department, our web application has been created specifically with tablets in mind, which doesn't stop it from being as effective on a computer! Its streamlined interface and accessibility make it a favorite among our customers.

AstusMOBI

Smartphones (all)
Electronic tablets

This application is the simplest version of all our software. AstusMOBI was designed for smartphones. It only offers real-time vehicle tracking (with a history of the 10 last positions) and task management. It's typically used by drivers to accept and complete their tasks while on the road.
